

Mechanical Contractors...

Is HVAC Recycling the Best Use of Your Assets?

As a Mechanical Contractor, you know that your biggest assets are good technicians and a book of billable hours. After all, **how much is a healthy and productive technician worth?**

At AES Reclaim, our focus and national footprint is your gain with recycling centers strategically located across the country with EPA Universal Certified Technicians on staff. A partnership with AES Reclaim allows you to focus your time and valuable technician assets to where they are best utilized while still being able to profit through recycling your customer's expired HVAC and refrigeration equipment!

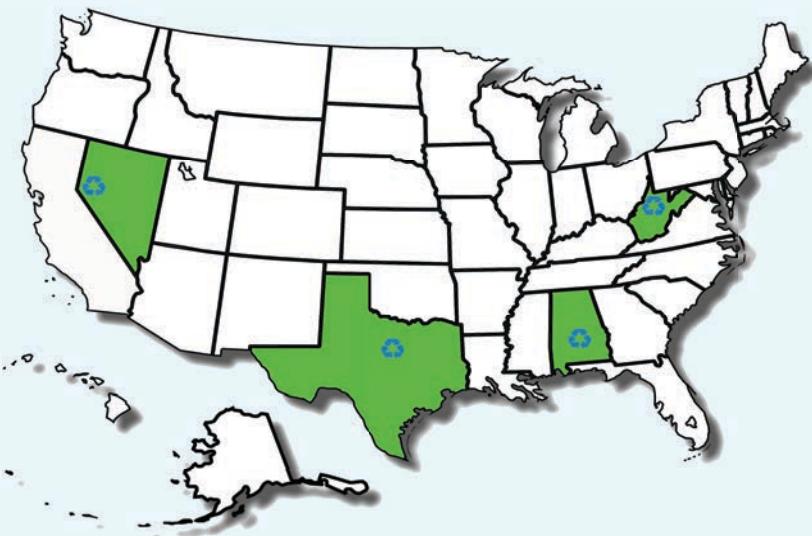

Eliminate the hassle and cost of equipment transportation, refrigerant recovery, oil extraction, EPA record keeping, extraction tooling and labor risk to your valuable technicians. **A partnership with AES Reclaim is a partnership in profit!**

Partner with a **specialist** to help you maximize your recycling profits!
